

The Cisco 250 Series Switches are next-generation smart switches that combine powerful performance and reliability with essential network management features you need for a solid business network. These entry-level, web-managed switches now come with even more features to keep your business productive while staying affordable and easy to use.

- 8 10/100/1000 ports (8 PoE+ ports with 62W power budget)
- 2 Gigabit RJ45/SFP combo port

Features

- **Powerful capabilities:** Apart from basic management, security, quality-of-service (QoS), these switches now support even more capabilities like Multiple Spanning Tree (MSTP), Power over Ethernet Plus (PoE+) and PoE pass-through.
- **Easy setup and management:** Our intuitive browser-based user interface now get even smarter with simple mode and configuration wizard for most common configurations. The switches also come with a USB port for easier file management.
- **Performance and reliability:** Designed and tested to deliver the high performance and reliability you would expect from Cisco switches, so you can enjoy speedy file transfers and keep vital business applications available.
- **Energy efficiency:** Rich energy saving features across the portfolio, including energy detect, cable length detection and Energy Efficient Ethernet (EEE) provide an eco-friendly and cost-effective solution without compromising performance.
- **Peace of mind:** All switches come with a limited lifetime warranty and include one year of technical support and free software fixes for the term of the warranty

Specifications

- 8 and 24 ports 10/100/1000Mbps models with 2 Gigabit combo uplinks
- 48 ports 10/100Mbps models with 2 Gigabit combo + 2 Gigabit copper uplinks

- PoE+ options with different power budgets to choose from
- High power PoE PD and PoE pass-through on 8 port compact model
